

DESCRIPTION

Marine ventilation louvers with fixed blades VLB type are destined for installation in ventilation systems of seagoing ships and offshore objects. Louvers may be fitted where weathertight closing devices (Convention ILL 1966) are not required. Regulations of SOLAS for fire closing of external ventilation openings are to be observed.

Louvers consist of flanged, drilled frame and a set of fixed blades. Frame and blades are made of carbon mild steel. Surface treatment: hot-dip galvanized. Preservation with set of marine paints available on request.

DIMENSIONS

MARKING:

Example: VLB type louver of dimension $B \times H = 750 \times 1200$: VLB-750x1200
