

DESCRIPTION

Ventilation hoods VH-S are destined for installation in ventilation systems of special category spaces of ro-ro ships. They are provided with weather-tight/fire cover in accordance to SOLAS regulations. VH-S type hoods can be installed on weather decks. VH-S hoods consist of flanged coaming and cover actuated by pneumatic cylinder fitted on the housing of the hood. Optionally hood may be delivered with limit switches for remote indication of position of cover in ordinary or non-sparking execution (Ex-class must be specified by the buyer). Coaming is made of carbon steel St3Sx, hot-dip galvanized, wire gauze is made of stainless steel 316 and spindle of closing device – stainless steel. By ordering specify required nominal diameter DN.
